

1 July 2021

To Whom it might concern,

TERMINATION OF THE ENERMAX PLUS ENERGY AND DEMAND METER

This letter serves as formal notification that, after very careful consideration, Strike Technologies has decided to discontinue the manufacture and sale of the Enermax Plus Energy and Demand meter.

The affected products are as follows:

- Enermax Plus 400V, 4-wire CT operated meter (E+MA-454000)
- Enermax Plus 110V, 3-wire CT operated meter (E+MA-153000)
- Enermax Plus 400V, 3-wire CT operated meter (E+MA-654000)

This does **not** include the following Enermax communication modules and optical head that will continue to be manufactured until further notice:

- RS232-485 communication module (E+EA-RS2324)
- GSM-GPRS communication module (E+EA-GPRS04)
- Ethernet communication module (E+EA-ETH004)
- Optical head (E+AA-OPU1-8)

The discontinuance of this product line is in keeping with our practice of rationalizing low demand products and aligning our development strategy to focus on new, more exciting products to complement our product basket.

Our intent is to accept orders until current stock levels have been depleted.

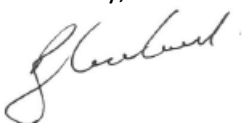

Strike Technologies' standard warranty terms will be honoured for all units procured. Technical support will continue to be offered to our customer base.

Repairs to Enermax units will be supported for a period of 2 (two) years but will be dependent upon any obsolescence of components.

Strike Technologies certainly values and appreciates your custom, partnership and business relationship and we therefore extend our sincere gratitude to those that have supported the Enermax product over time.

While we regret and apologize for any inconvenience this announcement may cause, we look forward to you continued interest in our business and are eager to meet your future product requirements with our quality product lines.

Sincerely,

Brent Kinloch
Managing Director
